

Connecting to the LSUHSC wired network with Mac OS 10.8 (and above)

- With the computer off, use a blue Ethernet cable (also available for checkout from the Library's Circulation Desk) and plug into the Ethernet port on your computer and an available Ethernet port in the Library (blue outlet)
- If you already had the computer on when plugging in the cable, it is best to restart
- After turning on/restarting, you will be prompted to log in using your LSUHSC user i.d. and password:

A screenshot of a Mac OS system dialog box titled "Enter the name and password for this 802.1X network". The dialog features a globe icon with network lines on the left. It contains two text input fields: "Account Name:" and "Password:". Below the password field is a checkbox labeled "Remember this information" which is checked. At the bottom right are "Cancel" and "OK" buttons.

Enter the name and password for this 802.1X network

Account Name:

Password:

☒ Remember this information

Cancel OK

- If you leave the "Remember this information" box checked, your login information will be saved
