

To get citations into RefWorks from...

PubMed

1. Perform a search and mark the references you want to export.
2. Change the **Display option** from **Summary** to **MEDLINE**.

3. In the “**Send To**” drop-down menu, select **File**. Save the file somewhere you can find easily on your computer, like the Desktop.
4. Log in to **RefWorks**.
5. Select **References/Import** from the toolbar.
6. Select **NLM PubMed** as the data source and as the database.
7. **Browse** to find the text file you saved to your computer.
8. Click **Import**.
9. Your records should appear in the **Last Imported Folder** in RefWorks

EBSCOhost

1. Conduct a search.
2. Click on the **Add** folder icon to the right of any results you want to save.
3. Click on the **Folder has items** link, above the **Results List** on the right side of the screen. Select the references you want to add.
4. Click **Export**.
5. Select the button for **Direct Export to RefWorks** to initiate a direct export.
6. Click the **Save** button to begin the direct export.
7. Your records should appear in the **Last Imported Folder** in RefWorks.

Ovid

1. Select the references you want to export.
2. Click on **Results Manager**.
3. Select **Complete Reference** in the **Fields** section.
4. Select the **Direct Export** format.
5. Click the **Save** button.
6. Select **Export Citations to RefWorks** and **Continue**.
7. The export will open **RefWorks** if it is not already open and automatically import the references.
8. Your records should appear in the **Last Imported Folder** in RefWorks.
