

## Education, Service , and Patient Care Committee

### Summation of Plans of Action for ESPCC 2010-2010

- **Short term Goals:** Facilitate 'Faculty Senate Day of Service' Project
  - This is an action charged by the Senate.
  - The function of this project
    - serve as a model for the faculty,
    - present a positive image for LSUHSC.
  - Suggested requirements:
    - a 'single day' project as opposed to a long term project
    - would be separate from any ongoing projects.
  - The plan of action for this project is in a separate report
  
- **Intermediate Goals:** Accumulate and present in an on-going manner (website) the ways in which faculty are currently serving the community.
  - It is likely that many faculty are doing community service projects on either a regular or infrequent basis. This should be recognized. Additionally, it may give ideas how the faculty on a larger level could serve the community.
    - These would be non-related to what is done for/with the school
    - These could be posted on a website – updated on a semi-regular basis
    - Erin and Theresa discussed that certain members could gather information for their schools – though there has also been some gathering of this data from the school (Erin and Joy said they have been asked by their school).
    - This will be discussed further after the Service Day established.
  
- **Long term Goals:** Instigate an either long term or recurrent service project for the faculty senate/faculty.

Decided by committee 3/1/10
