

Changing the Course of Health Education

We are **BETTER TOGETHER** *working as a*

T

Thank you for believing in a team-based approach to improve the health of the individuals & communities we serve. The CIPECP has grown tremendously over the past two years in its efforts to develop & enhance IPE.

Over **185** faculty members from all six Schools have contributed to the success of the institution's IPE initiative (*see page 2*)

This initiative would not be possible without the assistance from Facilities, Library, Office of Research Services, Security, Parking Services, Registrar Office and IT (Moodle, AV, etc).

E

Enhanced student IPE exposure over the past two years, through the development and implementation of

11 new [small-based IPE experiences](#)

2 large-scale IPE Day events

Educational outcomes/student learning objectives measured by national IPE sub-competencies demonstrate a statistical significance in student perceptions of competence related to roles/responsibilities, communication, teamwork, & patient-centered care.

A

Added to the IPE body of knowledge through publications & scholarly activity:

15 [published articles](#)

13 journals

34 faculty & student authors, representing all 6 Schools & 12 programs

29 [scholarly presentations/poster presentations](#)

Additionally in progress:

3 manuscript submissions

7 manuscripts in development

5 educational research studies

M

Moving forward, we are:

1. engaging in our 1st clinical research project investigating team behaviors & quality improvement in NICU resuscitation events at Children's Hospital

2. going to measure respiratory therapy student perceptions of their interprofessional behaviors & clinician team behaviors in a clinical setting post IPE high-fidelity simulation experience

3. coordinating & developing an IPE high-fidelity simulation experience for all 3rd year medical students & all senior undergraduate and CARE nursing students (430 students)

Changing the Course of Health Education

Thank you for your contributions.

With your support and dedication, our institution is making a difference in student education and the health of the communities we serve.

Changing the Course of Health Education

Interested in developing your skills as an IPE facilitator and learning more about different health professionals' perspectives? Consider becoming a member of Team Up!

COMING SOON to LSUHSC-New Orleans

TEAM UP

commit to

COMPASSION, COMMUNICATION, COLLABORATION

Beginning September 2017, a two-year interprofessional education longitudinal experience for incoming students to promote patient-centered collaboration among health care team members

If you would like to learn more about Team Up, please visit our [website](#).

If you are interested in becoming an IPE facilitator for Team Up, please contact Bobby Moore (rmoo13@lsuhsc.edu). Future training sessions are available [here](#).
