Since most institutions have committees that assess the impact of the proposed research at their facility, it is the responsibility of the investigator to assure that approval has been obtained from the appropriate officials of the non-LSUHSC-NO sites listed on the application form. Except for LSU facilities, e.g., Health Care Services Division hospitals and clinics or LSUHSC-NO Health Care Network clinics, this documentation must be provided to the IRB prior to approval and implementation of that location as a performance site for the study.
