## Pay for Print

The LSUHSC Library was pleased to unveil its new laser-printing system in March. This networked system allows patrons to print from any computer in the library, as well as from laptops brought into the library, at a cost of 10 cents per page. Computer lab users will enjoy the much-improved quality of laser printing over the older dot-matrix printing that was previously available, and users of the library's public-access terminals will now be able to print out their INNOPAC and Ovid search results rather than hand writing or emailing them.

With this system, a print job is sent electronically from the user's computer to one of two Library "print release stations." From these stations, a patron may retrieve his/her password-protected document from a print queue, pay for it, and print it out. To pay for print jobs, LSUHSC faculty, staff, and students may add value to their new LSUHSC ID cards. Or, patrons may instead choose to purchase a "print card" from a vending machine in the Library (or from the Bookstore) for \$1. LSUHSC departments may purchase cards for use by their department just as they do for photocopying.

Since the Library print system is part of the new campus-wide printing system, the same LSUHSC ID or print card can be used at the various student computer labs, as well as at the Dental Library. At this time, the campus printing system and the photocopying system are not the same, so money put on print cards cannot be used for copying, and vice versa. This fall, however, the photocopier system will be converted, and LSUHSC IDs and print cards will be used for both printing and photocopying.

As always, the Library Staff is available to help you familiarize yourself with the system and to answer your questions. We enjoy providing new services for our patrons, and we invite LSUHSC faculty, staff, and students to try out this new service.

## Library Expands Access to Electronic Journals

In January 2000 the LSUHSC Library continued its initiative to expand electronic access to resources through the purchase of the IDEAL® electronic journal package from Academic Press. IDEAL (International Digital Electronic Access Library) is an online library featuring full-text [journals](#) from Academic Press and other respected publishers, such as W.B. Saunders, Ltd. and Churchill Livingstone Press. Full-text access to approximately 119 titles is now available electronically. Of that number the Library has both print and electronic access to 47 titles and 72 titles for which there is only the electronic version.

This access was accomplished through a consortium arrangement between the South Central Academic Medical Libraries Consortium (SCAMeL) and Academic Press. SCAMeL is composed of the academic health science libraries in the five-state region of Louisiana, Arkansas, Oklahoma, New Mexico, and Texas.

[IDEAL®Alert](#) *link removed*, a new current awareness service from IDEAL. Registered users will receive via e-mail both daily and weekly Digests of the latest journal issues available on IDEAL as well as individual journal Tables of Content. To begin using the service a person simply completes the Registration Form. Once registered, a user can make additions and deletions to the journals of interest.

To access the IDEAL titles a user must have a web browser, Adobe's free Acrobat Reader software, and must be connected to the LSUHSC campus network. Links to the titles are included in the Library's online catalog (the [Innopac](#) *link removed*), or a user can access all the Library's electronic journals from the Library's homepage and the [Electronic Access to Journals & Books](#) *link removed* list. The electronic holdings for many IDEAL titles are 1999 forward. For others, access begins with the issues in 2000.

The LSUHSC Library continues to expand its electronic access to both journal and book resources. Your suggestions and questions are welcomed. For assistance in using these resources or any others in the library, please contact the [Reference Department](#) *link removed* at 568-6102 or 568- 8339.

## Mediated Searches

In the past several years, the LSUHSC Library has made every effort to provide our users with computerized access to the bibliographic and full-text resources that are needed for research, study, and patient care. We also provide instruction in how to access and to effectively use these resources.

You may not be aware that the reference librarians are available to do literature searches for faculty, staff, and students. We can provide advice about which databases are the most appropriate for your question (everything is not in MEDLINE). We can offer guidance in the use of the best terminology and how concepts can be combined. Or, we can actually do the search for you.

Before user-friendly interfaces were developed, only thoroughly trained librarians were allowed access to the databases that are now widely available to everyone. The only way to get a literature search was to have the librarian run one for you. The librarians became very skilled in manipulating the databases to get the maximum number of relevant citations without retrieving too many irrelevant ones.

Won't you he'p us? (as Gov. McKeithen used to say). If you are not satisfied with the results you get searching on your own, please call us or send us an e-mail. We can consult with you over the phone to help you to devise a satisfactory search strategy or we can discuss your needs and then run the search ourselves and send you the resulting bibliography. Search results can be provided in different formats: paper or electronic (email or on disk).

There is no charge for mediated searches for LSUHSC faculty, staff, or students (in good standing, of course) unless we have to access resources that are not part of Ovid or LOUIS. If access to additional databases is required, any fees accrued by the Library are passed on to the patron.

Reference librarians can be reached at (504) 568-6102 and 568-8339. On the Dental Campus call (504) 619-8507 or 619-8550. Our e-mail addresses are linked from the Library's web page: <http://www.lsuhs.edu/no/library/staff.html> *link removed* The Dental Library staff can be reached from their web page: <http://www.lsusd.lsumc.edu/libr/> *link removed*.

## Faculty Publications Databases

LSUHSC Library staff members have created local databases in which bibliographic citations to publications by LSUHSC-New Orleans faculty can be searched. The citations are grouped by calendar year and are found in Reference Web Poster on the Library's Homepage under Locally Created Databases, or on the Internet at <http://melvil.lsuhscc.edu/ris/risweb.isa> *link removed*. Searchable fields include author, keywords (including medical subject headings), journal title abbreviation, year, and title. Citations currently available are for the years 1998, 1999, and 2000, with each database containing a few citations from the previous year due to late indexing.

Included in these databases are citations to editorials, letters to the editor, meeting abstracts, technical notes, book reviews, and papers in the scientific periodical literature as received weekly from the Institute for Scientific Information. Additional references are retrieved from PubMed, a search service of the National Library of Medicine that provides access to MEDLINE and other related databases. Also included in the Faculty Publications databases are citations to books and book chapters, which are contributed directly by faculty members. For help with searching these databases, please contact the Reference staff at 568-6102 or 568-8339 at the Resource Center Library, or 619-8507 at the Dental Library.

Faculty members are invited and encouraged to submit citations for inclusion in the current database. Please send complete references to Elizabeth Dean, Library Associate, Box B3-1, Resource Center. They can also be submitted via e-mail to [edean@lsuhsc.edu](mailto:edean@lsuhsc.edu) *link removed*, or faxed to 568-7720.

## New Services

### Interlibrary Loan Form on the Web & Children's Document Delivery

#### ILL Forms Available on the Web

The LSUHSC Library is pleased to announce the availability of its Interlibrary Loan form on the web. The forms are available via PDF or Word file and may be submitted via email, by registered users. Please note that different forms are used depending on which location is desired for pickup. The address for the forms is <http://www.lsuhs.edu/no/library/ill.html> *link removed*. The email address for submissions is [ILL@lsuhsc.edu](mailto:ILL@lsuhsc.edu) *link removed*.

#### Document Delivery Service Available to Children's Hospital

In order to provide better support to LSUHSC faculty and staff located at Children's Hospital, the LSUHSC and Children's Hospital Libraries have implemented a delivery service for materials owned by LSUHSC Libraries. Using Ariel, an Internet-based document delivery system, articles are requested from the LSUHSC Libraries by the Children's Hospital Library. These requests are normally delivered via the Internet within 24 hours. For further information on this service, contact Jennifer Lloyd at LSUHSC ([jlloyd@lsuhsc.edu](mailto:jlloyd@lsuhsc.edu) *link removed* or 568-5550) or Catherine Mooney at Children's Hospital ([cmooney@chnola.org](mailto:cmooney@chnola.org) *link removed* or 896-9264).

## Ovid Hints:

### Finding the Journal of your Dreams

Finding journal titles in Ovid is simple; you just enter the name of the journal in the search field and click on the journal icon or use the journal field qualifier (.jn.)

Gastrointestinal Endoscopy.jn.

Presto, an alphabetic list of journal titles appears with the one you are searching for already checked off for you. All you have to do is click on the continue button and Ovid presents you with a list of indexed article citations from the journal you are looking for. You can then limit your search further by year, author, title word, etc.

What if, however, you are unsure of the title of the journal you need. Say you only have an abbreviation, or you got the name by word of mouth and the information may not be quite correct. Things get a little more complicated then, but have no fear; with just a little help you can find those journals as well. Ovid lists journals by their FULL titles. So you have to figure out those pesky abbreviations and simply use the truncation symbol to search for your journal. Ovid uses the \$ symbol for unlimited truncation. So, to search for Gastrointest Endosc you would type in,

Gastrointest\$.jn.

or

Gastrointestinal Endosc\$.jn.

Either of those two examples will put you in an alphabetic list from which to choose the title you want.

Good luck and happy hunting!

-- Jennifer Kelly

## Highlighted Websites: Auto Repair

Nobody likes being at the mercy of machines, yet that's exactly the position most of us find ourselves in when the car starts acting funny. This is usually accompanied by the feeling of impending doom associated with a trip to the mechanic. The "service" rendered is often associated with a rattling noise that transmogrifies into a \$400 repair bill and a page of encoded hieroglyphics and mechanical jargon as impenetrable to the layman as Multivariate Calculus. Here are just a few of the web sites available to help cut through the confusion and ease the anxiety of auto repair.

### **ASE (National Institute for Automotive Service Excellence)**

**[www.asecert.org](http://www.asecert.org)** *link removed*

This non-profit organization promotes the certification of auto technicians to help raise the standards of service and repair. Under the heading of "Tips for Motorists" can be found a variety of car care and consumer education information.

### **Cyberwrench**

**[www.cyberwrench.com](http://www.cyberwrench.com)** *link removed*

Even if you're not mechanically savvy, this site provides an audio diagnostic so you can use the noises the car is making to determine the problem. For example, the squealing of a worn fan belt and the grinding of a bad starter are clearly represented. There are also pull down menus geared towards diagnosing car problems and providing approximate prices for repairs including parts and labor.

### **Family Car (The Dream and the Reality)**

**[www.familycar.com](http://www.familycar.com)** *link removed*

The good, the bad, and the ugly aspects of owning a car are explored. Other topics represented are finding the car that best suits your needs, becoming a safer driver, and finding a repair shop. Under "Car Care" is a listing of the time intervals for everything from oil changes to tire rotation to keep the reader aware of the regular maintenance that may prevent or prolong a costly repair.

### **Woman Motorist**

**[www.womanmotorist.com](http://www.womanmotorist.com)** *link removed*

Don't dwell on the name; this site is for everyone. "Maintenance," "Safety," and "Q&A," are just a few of the available headings. Informative articles help the reader to become empowered with clear explanations of automotive function and repair. The "Glossary" helps when unsure of the terminology. For instance, what is the difference between shocks and struts anyway? Not sure. This site will answer the question and spit back change.

## Staff News

**Marlene Bishop**, Acquisitions and Cataloging Associate, received her Masters in Library and Information Science from LSU. She graduated in May.

**Carolyn Bridgewater**, Reference Librarian at the John P. Isché Library (Resource Center), was elected Secretary for the Health Sciences Library Association of Louisiana (HSLAL).

**Pauline Fulda**, Associate Director of the Library, has been selected to participate in the National Library of Medicine 2000 fellowship program on Medical Informatics at the Marine Biological Laboratory in Woods Hole, Massachusetts. Participation is limited to 30 individuals for the weeklong Spring course. The course will focus on the application of information science and computer technologies in health care, biomedical research, and health professions education.

**Shane Harris** joined the Library Staff in January as the new Stacks Maintenance Supervisor. He was formerly employed by the University of Phoenix.

**Kerry Kareokowsky**, day circulation staff, left the Library in May. She has moved to Connecticut with her new husband.

**Jennifer Kelly**, Evening Reference Librarian at the Isché Library, is the chair of the HSLAL Nominating Committee.

**Kathy Kerdolff**, Reference Librarian at the John P. Isché Library (Resource Center), presented a paper, "Better Read than Dead: Breathing New Life into State Morbidity Data via the Internet" at the combined National meetings of the Medical Library Association (MLA) & the Canadian Health Libraries Association (CHLA) in Vancouver in May. She has also received from the Medical Informatics Section/MLA Career Development Awards a grant to expand her State Morbidity Database from the Medical Library Association Career Development Center. Louisiana Morbidity Data is currently available from the Library's web page at <http://www.lsuhs.edu/no/library/local.html> *link removed*.

**Julie Schiavo** joined the Dental Library staff as a Public Services Librarian. She is a graduate of the University of Southern Mississippi's School of Library and Information Science and was formerly employed by William Carey College School of Nursing.

**Wilba Swearingen**, Library Director, was co-chair for the Louisiana State Planning Meeting, entitled "Accessing Health Information...What's in it for You?" held at Pennington Biomedical Research Center on April 12th. The meeting was attended by approximately 150 individuals from health professionals to librarians to students to politicians.

## Publishing Information

LSUHSC Library-New Orleans' *Library Bulletin* is published three times per year, corresponding to the university's three semesters.

All current LSUHSC faculty, staff, and students should receive an automatic announcement about the availability of a new issue. If you are not receiving these announcements, or if you are not a current member of the LSUHSC community and would like to receive these announcements, please contact Jennifer Lloyd at [jlloyd@lsuhsc.edu](mailto:jlloyd@lsuhsc.edu) *link removed*.

Archived copies of the newsletter may be found via the LSUHSC Library's homepage at <http://www.lsuhs.edu/no/library/> *link removed*.

Additionally, the LSUHSC Dental Library publishes its own newsletter, the *Library Explorer*. Copies are archived via the [LSUHSC Dental Library homepage](#) *link removed* under *Library Explorer*.
