Welcome to the Campus Solutions (CS) 9.2 Upgrade Delta Guide! The PeopleSoft FLUID Enabled User Interface (UI) has come to Campus Solutions! FLUID is a modern, responsive UI that allows the PeopleSoft screen to be scalable and function on phones, tablets, and desktops screens without limiting element visibility. It has new functionality providing users a Navigational Bar (NavBar) for more intuitive navigation, role-based Homepages for easier access, and a modern, mobile-friendly interface. Although the look and feel of basic navigation has changed, the business pages you know and utilize have basically stayed the same, with the exception of color schemes and navigational breadcrumbs. This guide will assist you in navigating the new layout and aid you as you conduct your daily activities in the system.

1. LSUHSC Homepage
The LSUHSC Homepage provides access to the FLUID tiles for which you have access. Users click these tiles to access various transactions or modules within the system. Tile availability is dependent on your user access. This example shows the LSUHSC Homepage and tile availability for a Campus Solutions Administrator.
To access a module, such as Student Records, the Administrator would click the Student Records tile.

The Student Records Collection displays, starting with the Maintain Schedule of Classes screen. The data entry fields on the screens are the same as in the previous version of Campus Solutions, as shown in the examples of the Maintain Schedule of Classes screens below. Exceptions are the new screen no longer has the breadcrumb navigation across the top, and navigation to other items related to the chosen FLUID tile will display on the left of the screen. This list of related items is called Activity Guide Navigation. It is different from NavBar navigation (which is discussed later in the document) in that it only displays navigation to some of the more commonly used items, as delivered by Oracle, to the FLUID tile that was selected.

New Screen:
Faculty Self-Service
With the exception of a change of color scheme, and navigation, the data fields are the same as they are in the current system. To access My Advisees, faculty will click the My Advisees tile; to access the Faculty Center, click the Faculty Center tile.

This example shows the LSUHSC Homepage for Faculty Self-Service.
An example of the new Faculty Center user screen, after choosing the Faculty Center FLUID tile, is shown below.

![Faculty Center User Screen](image)

The *Activity Guide Navigation* area on the left can be hidden by clicking the blue tab in the middle of the screen.
Below is an example of a screen where the Activity Guide Navigation area is hidden.

![Screen shot of Activity Guide Navigation hidden](image)

**Student Self-Service**

This example shows the *LSUHSC Homepage* for Student Self-Service.

![Screen shot of LSUHSC Homepage](image)

By clicking the *Student Center* tile, the student will be taken to a page with the Activity Guide Navigation area on the left and the Student Center information on the right. With the exception of a change of color scheme, and navigation, the data fields are the same information they would have received if they had accessed the *Student Center* via the current system’s Classic Menu.
New Screen:

Previous Screen:
2. **LSUHSC Homepage Header Icons**

***On Login***

![Header Icons Image]

***After navigating to a Classic Menu***

![Header Icons Image]

a. **Home** – The Home button in the FLUID Header can be clicked to return to the LSUHSC Homepage regardless of where the user is in the system or what module is being used (i.e., Faculty, Student or Administrative Staff) with the one exception being on the Edit Favorites panel. On that panel the user must click Edit Favorites first for the Header Icons and the Home choice to display.

b. **Add to Favorites** - A quick navigation only seen on a screen that displays a Classic Menu to add a page to My Favorites.

c. **The Notification Flag** – This feature is not currently being used. The functionality will be added some time in the future and will notify users of any Actions or Alerts that require their attention.

d. **Actions List** – Click to see a list of options for the current window such as Help and Sign Out:

![Actions List Image]

e. **NavBar** – Click to access navigational options described below.
3. **The NavBar**

The **NavBar** contains three options (i.e., My Favorites, Recent Places and Navigator) for navigating the system, a Search option, and some users will see a Worklist option as well depending on their user ID access. You can choose which navigational option works best for you. The three navigational options will open within the **NavBar**, while the Search option opens in a new page.

**Search** - allows you to navigate directly from your search results to the action you are looking for. The item used for the search must have a minimum of two characters. You can also narrow your search results by using multiple words such as ‘Class Roster’ as your search parameter. Search will also take you directly to the menu that resembles the Current Classic Menu. This menu will display on the left side of your screen.
**Recent Places** lists the five most recent pages you have viewed in the system.

**My Favorites** displays your previously saved favorites. The **My Favorites** shown under the new **NavBar** come from any **My Favorites** you added in the current system. Click the **My Favorites** option to *edit or add* favorites as needed.

A list of previously created favorites will list when you open **My Favorites**. An **Edit Favorites** option is also available allowing you to remove favorites that are no longer needed and add new favorites to the list.

Click the **Edit Favorites** to access a menu that will allow the addition of a new favorite to the list.
From the **Edit Favorites** panel, click **My Favorites** and then **Add to Favorites**.

From the **Add to Favorites** panel, enter the **panel name** for the favorite you wish to add and then click **OK**. The newly added favorite will now display in **My Favorites**.

4. **Using the Navigator**

**Navigator** is the new way to navigate through the full menu of items for which you have access. *It is similar to starting from Main Menu in the current system.*

**Navigator** menus are used to move from page to page, but unlike the old menus they do not display the breadcrumb trail at the top of the page. Instead you can use the menu items that will display on the right of the screen.

To move from screen to screen using Navigator, click a module name (e.g., Student Admissions) and all items to which you have access to for that menu will display. You can continue to drill down until you reach the page you need. In this example, the user drilled down to reach the **Application Summary** screen.

As you click a module name, it moves to the top of the menu list. To the left of the module name is a **Back** arrow that will take you back to the previous menu. The **Up**
arrow to the right of the module name takes you to the Navigator Main Menu/Home screen, where navigation begins.

After clicking Application Summary, the Application Summary screen displays. The menu similar to the Classic Menu displays on the left and can be utilized for additional navigation.

At this time, access to the Worklist is limited to certain users.

5. Refresh

The Refresh icon is at the bottom of the home screen and is used to refresh the screen.
6. Remote Mobile Device Users
When accessing Administrator, Faculty or Student Self-Service remotely from a mobile device such as a smartphone or tablet, log in via https://remote.lsuhsc.edu. The screens and menu items basically work the same as if you were on a desktop computer, however, there might be some minor differences depending on device type, operating system, and screen size and/or screen orientation.

Large screen mobile devices with screens 10 inches and above (i.e. Microsoft Surface, Samsung Galaxy Tabs, iPad Pro, etc.) will appear the same as if accessing from a desktop computer on campus, with the exception of needing to log on and off to the remote LSU session. Below are some of the most notable changes when using a small screen mobile device. **NOTE: Please be aware that depending on the mobile device that you are using, your screen may appear slightly different that the ones you will see in this section of the document. There may also be a difference when holding your device landscape versus portrait mode.**

6.1. LSUHSC Homepage – Small Screen Device
The LSUHSC Homepage will show the tiles that you have access to, just as when on a desktop; however, depending on screen size, the tiles may display in a more compact manner. This example shows the LSUHSC Homepage and tile availability for a Campus Solutions Administrator (on the left) and a Faculty member (on the right) in portrait mode on an iPhone. To access a module, the Administrator or Faculty member would click the desired tile.

When a tile is selected a second screen with the choice of menu items for that tile will show next. Below is an example of a LSUHSC Homepage for a student. In this example, the student chooses Student Center via the small screen mobile device while in portrait mode:
A. The menu of items they have access to from the Student Center Tile appears. B. The student clicks on the Student Center menu item and the Student Center screen appears. C. The student rotates the phone to landscape mode for a larger view of the screen.

The data entry fields on the screen are the same as the desktop version of the screen. As with the desktop version, navigation to other items related to the chosen menu item will display on the left of the screen.
Reminder: Depending on screen size and orientation (portrait vs landscape) of the mobile device, you may need to scroll left to right, up and down or zoom in and out to see all of the information on the screen. Below is the screen in portrait mode scrolled left to right:

Left side of screen:

![Student Center](image)

Right Side of same screen:

![Student Center](image)
NOTE: The My Favorites tile displays a blank screen initially on a remote device when clicked, when there are no favorites already saved. This will happen for everyone: Administrators, Faculty, and Students. In order to get off of the blank page and back to the previous screen, you must click on the BACK button on your remote device.

In order to add a favorite on a remote device from the LSUHSC Homepage, click on the desired tile, navigate to a page, and then choose My Favorites from the left menu. In this example, Student Self Service is used.

Click the Student Center tile, and click the Student Center menu option. Navigate to the desired page. The page will display with a menu on the left side of the screen with My Favorites (A). Click on My Favorites, the options to Add to Favorites or Edit Favorites will appear (B). Click the Add to Favorites link to add the page to favorites. A small Add to Favorites box will appear (C). Enter a description and click OK.

Or

Once navigated to the desired page, click on the yellow star on the blue bar at the top, then enter a description and click OK.
An Edit Favorites option is also available allowing you to remove favorites that are no longer needed and add new favorites to the list.

6.2. The Remote Access Toolbar - All Devices Connected Remotely
The remote Access Toolbar will display at the top of the window. You can move it from left to right or right to left by clicking the Reposition Toolbar icon.

The Remote Access Toolbar has now moved from the right side to the left side.

6.3. LSUHSC Homepage Header Icons – Small Screen Devices
The icons at the top of the page will differ depending on if you’re on the Homepage or a chosen menu screen.

On Login (Homepage)

After navigating to a Menu

NOTE: The Home – The Home button that is shown when using a desktop is not available when using a small screen (i.e. smart phone) mobile device. Since the Home button
PeopleSoft Campus Solutions 9.2 Upgrade

is not available on the Menu Bar on small screen devices, to return to the Home Screen click the Actions List icon, then select Home.

The Action List also shows other functions you can perform depending on the screen you are on. For example, it is used to open NavBar navigation and to Sign Out of PeopleSoft. Help is shown in the list of menu options when on the Homepage screen but is not active at this time.

**NavBar**

The NavBar icon that is used on the desktop version of FLUID is not used when accessing the application remotely on a small screen device. As mentioned previously, you select NavBar from the Action List icon and the NavBar menu will appear:

Please refer to section 3. The NavBar of this document for more information on using the NavBar icons.

**Add to Favorites**

The “Add to Favorites” star icon can be clicked to add screens to My Favorites, only after one has been previously created. You can also add or edit a favorite from a data screen by using the My Favorites menu on the left when shown.
The Notification Flag

This feature is not currently being used. The functionality will be added some time in the future and will notify users of any Actions or Alerts that require their attention.

Sign Out

Once you have finished using Campus Solutions, you must click the Action List to sign out of PeopleSoft. Click the Actions List icon, then select Sign Out option.

Click the Log Off icon to exit the Remote Access Portal.
### 7. Appendix – All

The following is a list of the Collection Menu items that is found under each Fluid Tile

#### 7.1. Administrative Staff Tiles:

<table>
<thead>
<tr>
<th>TILE:</th>
<th>My Favorites</th>
<th>Campus Community</th>
<th>Student Records</th>
<th>Student Financials*</th>
<th>Student Customer Service</th>
<th>Recruiting and Admissions</th>
<th>Financial Aid</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>My Favorites</td>
<td>Campus Community</td>
<td>Student Records</td>
<td>Student Financials*</td>
<td>Student Customer Service</td>
<td>Recruiting and Admissions</td>
<td>Financial Aid</td>
