BRF (University Health Hospitals) Process Basic Reports - Web Method

Procedure

In this topic you will learn how to Process Basic Reports - Web Method.

**NOTE:** Web nVision is only available in the RPT database.

*If you experience issues with nVision Reports, contact the PeopleSoft Financials Functional Support Team for assistance by opening a Help Desk Ticket.*

</tr>
<tr>
<td></td>
<td>2. The Report Date Section; and</td>
</tr>
<tr>
<td></td>
<td>3. The Output Options Section.</td>
</tr>
</tbody>
</table>
Step | Action
---|---
12. | **The Report Request Section**

The top section includes the Business Unit and Report Request Name, Descriptive Report Title, and the Layout name that is utilized by the Report Request.

To the right are links that allow users to copy the report request (based on user's security), Transfer (navigate) to Report Books, navigate to the Process Monitor and navigate to the Report Manager. An additional link allows users to Share private report requests with other users (security based).
### Step 13. The Report Date Section

Includes the “As of Reporting Date” and the “Tree As of Date”. Typically, the “As of Reporting Date” is either the “Business Unit Reporting Date” or the selection of “Specify” which allows the user to enter a specific date for the report. The “Tree as of Date” will typically be set to “Use As of Reporting Date”.

A check box displays below the Tree As of Date line that reads, “Override Tree As of Date if Specified in Layout”. This box will always remain checked.
Step 14. The Output Options Section

**Output Type:** Allows the user to choose the output type of Web, Window, File, Email, or Printer. For this example, the output type of Web is used. The output type of Window (most commonly used) will be demonstrated in the next exercise and in the example for the Drill feature. An example of sending a report via email will follow the Drill example.

**The Output format will always be Microsoft Excel, .xls:** The other option, HTML, will produce reports; however, the formatting is incorrect.
15. Click the **Scope and Delivery Templates** link in the Output Options section.

16. The options displayed on this link's subpage are determined by the Output Type selected on the Report Request tab. The examples in this screenshot are based on the output type of Web.

   - The **Report Scope** Box will contain the Scope name if one is used with the Report. Scopes are used to create multiple report instances based on a set of parameters. **There are no reports that use Scope for the University Health Hospitals.**
   - The **Folder Name** will not be used for web based report distribution within the repository. This option only displays if the Output Option Type is Web.
   - The **Directory Name Template** box will be used to identify the file location if the File output type is selected. **The Output Type of File is not a valid option for the University Health Hospitals.**
Step | Action
--- | ---
17. | • The **File Template** is used to identify the file name that will appear in the Report Repository. This option will display when the Output Options Type is File, Email, or Printer.

• The **Content Description Template** is also used to identify the file name that will appear in the Report Repository. This option will display when the Output Options Type is Web or Window.

**NOTE:** The variables currently exist in the Windows version of nVision and will be carried over to the Web product.

The values displayed in the screen shot use Report Variables. The `%RBU%-%RTT%` (Requesting Business Unit - Report Title), the `%RID%` (Report ID) and the `%SFD%-%RTT%` (Scope Field Description - Report Title) are the most common examples.

• The **Security Template** will not be used for Web based Report Distribution within the repository.
<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
</table>
| 18.  | Most often, users will not make any changes to this subpage.  

Click the **OK** button.  

**OK** |

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
</table>
| 19.  | Click the **Advanced Options** tab.  

**Advanced Options** |
<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>20.</td>
<td>Generally, you should not need to change any of the settings on this page. Click the <strong>Enter Delivery Template Options - View All</strong> link.</td>
</tr>
</tbody>
</table>

**Enter Delivery Template Options - View All**
Step 21. This page includes all of the entry boxes from the link on the Report Request page, plus a File template and an Email template.

The File template box is used to name the .xls field. **NOTE: This feature is not currently used for the University Health Hospitals.**

The Email box would be used only if the report output type is set to Email.

Click the **OK** button.
<table>
<thead>

<tr>
<td>14.</td>
<td>No other changes are needed on the page with the Output Options Type set to Window.</td>
</tr>
<tr>
<td></td>
<td>Click the <strong>Save</strong> button.</td>
</tr>
<tr>
<td>15.</td>
<td>Click the <strong>Run Report</strong> button.</td>
</tr>
</tbody>
</table>
Step | Action
--- | ---
16. | Click the button to the right of the **Server Name** field.
17. | Click the **PSNT** list item.
18. | Click the **OK** button.
19. | As the report begins to run, a pop-up window displays. It will display the status of the report: Queued, Processing, Success, Error, etc.
<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>20.</td>
<td>When the report processes to &quot;Success&quot;, the pop-up window enlarges and a new Excel window displays. Sometimes, the report that opens will not be maximized.</td>
</tr>
</tbody>
</table>
### Step | Action
--- | ---
21. | Click the **Maximize** button.
22. | You may print the report or perform any nVision drills or Excel functions on the spreadsheet as desired.
23. | Many nVision reports include Macros to perform tasks within the spreadsheet. On these reports, a Security Warning will display at the top of the spreadsheet indicating that the Macros are disabled. If the message appears, click the **Enable Content** button to enable Macros.
24. | A pop-up Security Warning message displays. Click the **Yes** button.  
*NOTE: There is a method to enable all of the macros within Excel for your computer. The instructions to perform this task are included in the Appendix to this guide.*
25. | After enabling the Macro content and pressing the **Yes** button, you are returned to the spreadsheet. The Security Warning message has disappeared and the Macros included in this file are enabled.
### Step 26
Notice the grey taskbar at the bottom of the screen. To the right of the Start button, there are 2 Internet Explorer icons for PeopleSoft and an Excel icon. The Excel icon is active.

To navigate back to the report request in PeopleSoft from Excel, simply click the Define Report Request icon.

### Step 27
The second Internet Explorer icon, nVision-Report - NVSRUN...is for the processing window that was opened while running the report. This is no longer needed and should be closed.

Right-click the nVision-Report - NVSRUN button.
<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>28.</td>
<td>Click the <strong>Close Window</strong> list item.</td>
</tr>
<tr>
<td>29.</td>
<td>The processing window closes, leaving only the Report Request window available in Internet Explorer. Click the <strong>Define Report Request</strong> button to navigate back to the Report Request page.</td>
</tr>
<tr>
<td>30.</td>
<td>Click the <strong>Excel</strong> button in the taskbar to navigate back to the Excel spreadsheet.</td>
</tr>
<tr>
<td>Step</td>
<td>Action</td>
</tr>
<tr>
<td>------</td>
<td>--------</td>
</tr>
<tr>
<td>31.</td>
<td>Click the <strong>Office</strong> button at the top left of the Excel window to close the window and exit Excel.</td>
</tr>
<tr>
<td>32.</td>
<td>Click the <strong>Exit Excel</strong> button.</td>
</tr>
<tr>
<td>33.</td>
<td>Click the <strong>No</strong> button.</td>
</tr>
</tbody>
</table>
| 34.  | This completes *Process Basic Reports - Window Method*.  
**End of Procedure.** |

**BRF (University Health Hospitals) Enable DrillDown Feature (Optional)**

DrillDown is a feature that allows users to get more information on data contained in the report. Before performing the very first drill on any report, the drilldown (Drill to PIA) feature must be enabled. Once enabled, the drill feature will be available any time you run a report with nVision.

*NOTE: This feature should be enabled at the PSDesktop level. If the feature is not available, follow these steps to enable drilldown.*

**Procedure**
In this topic you will learn how to **Enable DrillDown Feature**.

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>Click the <strong>Main Menu</strong> button.</td>
</tr>
<tr>
<td>2.</td>
<td>Click the <strong>Reporting Tools</strong> menu.</td>
</tr>
<tr>
<td>3.</td>
<td>Click the <strong>Report Manager</strong> list item.</td>
</tr>
</tbody>
</table>
4. Select a report and click the appropriate Description link.

In this example the Balance Sheet Detail report is used.

Balance Sheet Detail

5. Click the Maximize button.

6. If the Add-Ins menu is not available to you, then the DrillDown feature must be enabled. Once enabled, an Add-Ins option will be added next to the View option on your ribbon.

Click the Office button.
<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>7.</td>
<td>Click the <strong>Excel Options</strong> button.</td>
</tr>
<tr>
<td>8.</td>
<td>Click the <strong>Add-Ins</strong> link.</td>
</tr>
<tr>
<td>9.</td>
<td>Click the <strong>DrillToPIA</strong> list item.</td>
</tr>
<tr>
<td>Step</td>
<td>Action</td>
</tr>
<tr>
<td>------</td>
<td>--------</td>
</tr>
<tr>
<td>10.</td>
<td>Click the <strong>Go</strong> button to the left of the Manage field.</td>
</tr>
<tr>
<td>11.</td>
<td>A small pop-up box displays. Click the <strong>DrillToPIA</strong> option.</td>
</tr>
</tbody>
</table>
Training Guide  
BRF (University Health Hospitals)

Step | Action
--- | ---
12. | Click the **OK** button.

13. | You are returned to your spreadsheet. DrillDown is enabled and a new menu option, **Add-Ins**, now displays on your ribbon.

14. | This completes **Enable Drilldown Feature**.  
**End of Procedure.**

**BRF (University Health Hospitals) Perform DrillDown**

DrillDown allows users to gather additional information on the data contained in a report produced by nVision. In essence, users get a "peek under the hood" to see what information comprises the results displayed in the report.

**DrillDown**

- Must be performed on cells that are at the intersection of a column and a row;
- May only be performed on cells that contain a number, not a formula;
- May perform additional drilldown on drilldown results; and
- Budget data is not presently drillable.

While reviewing the results of a report, you determine that you would like to get additional information; perhaps look at the individual period totals for an account or the Accounts Payable Detail for an account. DrillDown is the feature utilized to get this additional information.
Procedure

In this topic you will learn how to **Perform DrillDown**.

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>While navigating through the spreadsheet, it is recommended that users <em>Freeze Panes</em> so that the row and column headers remain visible. Click the cell located directly below the <strong>Current Balance</strong> column header.</td>
</tr>
<tr>
<td>2.</td>
<td>Click the <strong>View</strong> tab at the top of the Excel screen.</td>
</tr>
<tr>
<td>3.</td>
<td>Click the <strong>Freeze Panes</strong> option.</td>
</tr>
<tr>
<td>Step</td>
<td>Action</td>
</tr>
<tr>
<td>------</td>
<td>--------</td>
</tr>
<tr>
<td>4.</td>
<td>Click the <strong>Freeze Panes</strong> list item.</td>
</tr>
<tr>
<td>5.</td>
<td>In this example, you will drill on the Inv-Warehouse row and the Current Balance column; in the Account Assets Section of the report. Click the <strong>Down</strong> button of the scrollbar.</td>
</tr>
<tr>
<td>6.</td>
<td>Click the <strong>Inv-Warehouse</strong> row cell in the <strong>Current Balance</strong> column.</td>
</tr>
<tr>
<td>Step</td>
<td>Action</td>
</tr>
<tr>
<td>------</td>
<td>--------</td>
</tr>
<tr>
<td>7.</td>
<td>Click the <strong>Add-Ins</strong> tab at the top of the screen.</td>
</tr>
<tr>
<td></td>
<td><img src="Image" alt="Add-Ins" /></td>
</tr>
<tr>
<td>8.</td>
<td>Click the <strong>nVisionDrill</strong> option on the left of the Excel screen.</td>
</tr>
<tr>
<td></td>
<td><img src="Image" alt="nVisionDrill" /></td>
</tr>
</tbody>
</table>
Step | Action
--- | ---
9. | Click the **Drill** list item.

**Drill**
Step | Action
--- | ---
10. | A new PeopleSoft (Internet Explorer) tab opens. This tab contains the various drills that are available for use. Press the yellow Run DrillDown button to the right of the desired drill. In this example, the Breakdown by Account and Department drill is selected.

**NOTE:** The *Type* selection box at the top of the page displays Window so that the drill runs to the output option of Window. For drills, this is the default. The other option is Web, which would run the drill report and post it to the report repository.
Step | Action
---|---
11. | Click the **Run DrillDown** button for the Breakdown by Account and Dept option.

12. | When a report is run with the output type of Window, the nVision drill menu is replaced by the status window. Once completed, the status of **"Success"** displays in the window. At the same time, a new Excel spreadsheet window is created that will display the drill results.

13. | The Drill opens in a new window.

Press the DR_xxxxx_xxxx window at the bottom of the page if it does not maximize automatically. Or, if the window opens but the files are not full screen, you may press the maximize icon to enlarge the file on the screen.

14. | Click the **Maximize** button.

**NOTE: Once the drill window is maximized, you may print the spreadsheet, perform any Excel functions, or even perform an additional drill.**

15. | Once you are finished with this drill file, you may close it by pressing the **lower most X** at the top right of the page.

Click the **Close Window** button.
<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>16.</td>
<td>Click the <strong>No</strong> button.</td>

**BRF (University Health Hospitals) Process Reports - Output type PRINTER**  

**Procedure**  

In this topic you will learn how to **Process Reports - Output type PRINTER.**
Step | Action
--- | ---
1. | Navigate to the Report Request search page as follows:
   **Main Menu > Reporting Tools > PS/nVision > Define Report Request**
2. | Enter the desired information into the **Business Unit** field. Enter "BRFHS or BRFHM".
3. | Click the **Search** button.
<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.</td>
<td>Click the <strong>TBDETAIL</strong> link.</td>
</tr>
<tr>
<td>5.</td>
<td>Click the button to the right of the <strong>Type</strong> field.</td>
</tr>
<tr>
<td>6.</td>
<td>Click the <strong>Printer</strong> list item.</td>
</tr>
</tbody>
</table>
Step | Action
--- | ---
7. | Click the Save button. ![Save](Image)
8. | Click the Run Report button. ![Run Report](Image)
9. | Click the button to the right of the Server Name field. ![Server Name](Image)
10. | Click the PSNT list item. ![PSNT](Image)
11. | On the Process Scheduler Request page, you must select the Type as Printer. Click the button to the right of the Type field. ![Type](Image)
12. | Click the Printer list item. ![Printer](Image)
13. | Once the Type is changed to "Printer", the Format option changes to "XLS" and a Output Destination field displays.
14. In the Output Destination box, enter the network printer to which the report will be sent. If you are unsure of the network printer to which you should send the report, contact your local PC supporter.

For training purposes only, enter the desired information into the Output Destination field. Enter "\afprnsrv\LANIER".

15. You would then click the OK button to return to the Report Request page. The report will process and then be sent to the selected printer.

For training purposes only, click the Cancel button.

16. This completes Process Reports - Output type PRINTER.
End of Procedure.

BRF (University Health Hospitals) Process Reports - Output type E-MAIL

nVision Reports may also be emailed directly to other PeopleSoft users. The report request is used to define the user to whom the report will be sent. When using this feature, you will not have the opportunity to review the report prior to sending it via email.

Procedure
In this topic you will learn how to Process Reports - Output type E-MAIL.

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>Navigate to the Report Request search page as follow: Main Menu &gt; Reporting Tools &gt; PS/nVision &gt; Define Report Request</td>
</tr>
<tr>
<td>2.</td>
<td>Enter the desired information into the Business Unit field. Enter &quot;BRFHS or BRFHM&quot;.</td>
</tr>
<tr>
<td>3.</td>
<td>Click the Search button.</td>
</tr>
</tbody>
</table>
Step | Action
--- | ---
4. | Click the **TBPERIOD** link.

5. | Click the button to the right of the **Type** field.

6. | Click the **Email** list item.
Step | Action
--- | ---
7. | Click the **Scope and Delivery Templates** link. **Scope and Delivery Templates**
8. | On the nVision Email Output page, enter the recipient's email address in the Email Template field. Multiple user email addresses can be entered, but **must** be separated by a comma (e.g. xxxxx@lsuhsc.edu, xxxxx@lsuhsc.edu).

Enter the desired information into the **Email Template** field. Enter "**Recipient's Email Address**".
9. Click the **OK** button.

10. Click the **Save** button.

11. Click the **Run Report** button.

12. Click the button to the right of the **Server Name** field.

13. Click the **PSNT** list item.

14. Click the **OK** button.

15. Click the **Process Monitor** link.
16. Click the Refresh button every 15 - 20 seconds until the Distribution Status is “Posted”.

Click the Refresh button.
<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
</table>
| 17.  | Once the Distribution Status = Posted, the system will generate and send an email to the listed email account with the report attached.  

*NOTE: The email will be sent from PS9FSPRSCH@lsuhsc.edu.*  

Click the **Outlook** button.  

![Outlook button](image)
<table>

</table>
19. A new window is opened and the report displays. Once the report is open, you may perform any drill or Excel function as desired.

**NOTE:** You may receive a security message if the report is not from a trusted source.

Click the Close button.

20. This completes **Process Reports - Output type E-MAIL**.

**End of Procedure.**

BRF (University Health Hospitals) Process Reports - Output type E-MAIL (User may enter text in the body of email)

**Procedure**

In this topic you will learn how to **Process Reports - Output type E-MAIL (User may enter text in the body of email)**.

**NOTE:** This topic teaches the user an alternate method for distributing reports via email. This method allows the sender to enter text into the body of the email.
### Step 1
For this exercise, the same Report Request as used in the last lesson will be utilized. Click the **Go back to Report Request** link.

**Go back to Report Request**

### Step 2
Click the button to the right of the **Type** field.

### Step 3
Click the **Web** list item.

### Step 4
Click the **Save** button.

### Step 5
Click the **Run Report** button.

**Run Report**

### Step 6
Click the button to the right of the **Server Name** field.

### Step 7
Click the **PSNT** list item.

**PSNT**
<table>

</tbody>
</table>
Step | Action
--- | ---
16. | **NOTE: The Output Type is set to Window.**
   
   Click the **Run Report** button.

17. | Click the button to the right of the **Server Name** field.

18. | Click the **PSNT** list item.

19. | Click the **OK** button.
   
   **NOTE: After clicking the OK button and returning to the Report Request page, the nVision Processing Window will display.**
Step 20. Once the report has processed to the Success status, the Excel file opens.

Click the **Maximize** button.
## Step 21

If the columns do not display all of the numbers correctly, you may adjust the column width.

**Highlight** all columns affected by clicking on the column letter in this example, columns **F**, **G**, **H**, and **I**.

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>21.</td>
<td>If the columns do not display all of the numbers correctly, you may adjust the column width. Highlight all columns affected by clicking on the column letter in this example, columns F, G, H, and I.</td>
</tr>
</tbody>
</table>
22. Hover the mouse at the outer end of column I. Drag the column border out until the columns are wider and the #### are replaced by the dollar amounts.

23. You may print, save or perform any desired drilldowns.

   Click the Close button.

24. Click the No button.

25. Click the Close button.

26. This completes Process Prompt Reports.

   End of Procedure.

BRF (University Health Hospitals) Appendix

BRF (University Health Hospitals) Procedure for Enabling Macros

Procedure
In this topic you will learn the **Procedure for Enabling Macros**.

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>Users may choose to enable all macros for Excel/nVision thus allowing all of the custom macros in the nVision reports to run as desired. The user must enable all macros through the Trust Center in Excel Options. Once selected, this setting is retained from PSDesktop session to session. If a user chooses not to enable all macros, the user would need to enable macros for each file containing macros. Both methods are detailed in the following steps.</td>
</tr>
<tr>
<td>2.</td>
<td>Enabling All Macros</td>
</tr>
<tr>
<td></td>
<td>Click the <strong>Office</strong> button.</td>
</tr>
</tbody>
</table>
### Step 3
Click the **Excel Options** button.

![Excel Options](Image)

### Step 4
Click the **Trust Center** menu.

[Trust Center](Image)
5. Click the **Trust Center Settings** button.

6. Click the **Macros Settings** menu.

7. Click the **Enable all macros (not recommended; potentially dangerous code can run)** option.
<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>8.</td>
<td>Click the <strong>OK</strong> button.</td>
</tr>
<tr>
<td>Step</td>
<td>Action</td>
</tr>
<tr>
<td>------</td>
<td>--------</td>
</tr>
<tr>
<td>9.</td>
<td>Click the <strong>OK</strong> button on the Trust Center page.</td>
</tr>
<tr>
<td>10.</td>
<td>The settings will now be retained from session to session.</td>
</tr>
<tr>
<td>11.</td>
<td>This completes <em>Procedure for Enabling Macros</em>. &lt;br&gt; <strong>End of Procedure.</strong></td>
